Subject: BASF Processing and Application of Liquid Spray Compounds for Friendship Village Project

Dear Jay:

BASF has been requested to write a letter to document that your company has the capability and experience to process and apply our liquid spray foam compounds (part A and part B) as distributed by Joe Betchek.

The processing and application of the liquid compounds is to be done following BASF, Industry and government requirements to provide a safe and proper application in the field. Spartan Insulation has purchased our spray foam compounds for several years and has extensive experience with the application of these materials.

Please use this letter to document your company's ability to process and apply BASF liquid compounds for field spray foam applications. If there are questions, please contact me at 612-845-4379 or my e-mail jim.andersen@basf.com

Sincerely yours,

A handwritten signature in blue ink that reads "Jim Andersen".

Jim Andersen
